

Model **RV** Ridge Ventilator

- · Ideal for metal buildings
- Inconspicuous high volume exhaust ventilator.
- RV Series is a standard 10' section complete with end caps for single unit installations.
- RCV Series is a continuous ventilator, and the 10' sections are spliced together.
- Unique slip type join plates permit 10' sections to telescope without the need for seperate fasteners.
- Optional damper raises and lowers to any position.
